

Silicone Leveling agent DCA-132

dcachem.com/portfolio/silicone-leveling-agent-dca-132

Introduction

DCA-132 is a polyether-modified organosilicon compound. It has excellent compatibility with most resin systems and does not adversely affect re-coatability. DCA-132 has moderate ability to reduce surface tension and can be used as a leveling agent to achieve excellent leveling performance, and same time with good touched feel and anti shrinkage ability.

Physicochemical Data

- Chemical composition: Polyether-modified silicone oil.
- Appearance: Light yellow transparent viscous liquid.
- Active content: 100%
- Solvent: None

Product features

- Excellent leveling ability
- Not effect recoatability
- Good compatibility with various resins
- Anti shrinkage ability
- Good touched feel

Application areas

It is suitable for UV-curable coatings and can be used in both solvent-based and water-based systems.

Suitable for baking system that the temperature are less than 150 degree.

Similar Products: Tego-432

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

It can be added at any stage of production

Recommended dosage: 0.1-1.0% of the total formulation

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
