

Silicone Leveling agent DCA-1436

dcachem.com/portfolio/silicone-leveling-agent-dca-1436

Introduction

DCA-1436 is a polyether-modified organosilicon compound that is compatible with both water and oil. It provides excellent tactile sensation and anti-pinhole effects, as well as excellent scratch resistance and anti-adhesion properties for the system. It does not affect the recoatability, and Tech-1436 also has excellent orientation ability for matting agents and can be used in baking systems with temperatures below 150 degrees Celsius.

Physicochemical Data

- Chemical composition: Polyether-modified silicone oil.
- Appearance: Light yellow transparent liquid
- Active content: 100%
- Solvent: None

Product features

- Anti-stick
- Excellent leveling ability
- Good feel
- Not effect recoatability
- Anti scratch
- Matting powder orientation

Application areas

DCA-1436 can be widely used in solvent system, UV and water system

Similar Products: BYK-378

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

It can be added at any stage of production

Recommended dosage: 0.1-1.0% of the total formulation

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
