

Anti Graffiti Resin DCA-2160

 dcachem.com/portfolio/anti-graffiti-resin-dca-2160

Introduction

DCA-2160 is organic modified polysiloxane with -OH group. It has good compatibility and could be used in clear systems. Because of its special structure, its silicone section could be stay on the surface of the paint film intensively and could supply the ***anti-graffiti and anti-blocking effect***

Physicochemical Data

- Chemical composition: Organic modified polysiloxane
- Appearance: Colorless viscous transparent liquid
- Active content: 45%
- Solvent: PMA

Product features

- Anti crater
- Anti Adhesive
- Anti Graffiti

Application areas

Suitable for various solvent-based coating systems

Addition Method

The dosage can vary depending on specific requirements, ranging from 1% to 30% of the total formulation

Packaging and storage:

25KG iron drum, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
