

Substrate Wetting Agent DCA-244

 dcachem.com/portfolio/substrate-wetting-agent-dca-244

Introduction

DCA-244 is a special designed Gemini surfactant. It is suitable for water borne systems to supply substrate wetting and low foaming. It could decrease both dynamic and static surface tension.

Physicochemical Data

- Chemical composition: special Gemini surfactant
- Appearance: Light yellow transparent liquid
- Active content: 100%
- Solvent: None

Product features

- DCA-244 consists of modified Gemini surfactant
- DCA-244 could decrease both dynamic and static surface tension

Application areas

DCA-244 is recommended to use in the **water borne** systems.

Addition Method

Usually, it could be charged at random stage during the produce with 0.1% to 1% dosage to gross.

Similar Products: surfynol-440

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
