

# Silicone Leveling agent DCA-1331

[dcachem.com/portfolio/silicone-leveling-agent-dca-1331](http://dcachem.com/portfolio/silicone-leveling-agent-dca-1331)

## Introduction

DCA-1331 is a polyether-modified organosilicon compound that has excellent compatibility with most resin systems and has no adverse effects on recoatability. DCA-1331 has a moderate ability to reduce surface tension and is an excellent leveling agent. At the same time, DCA-1331 has a certain defoaming ability in high polarity resin systems.

## Physicochemical Data

- Chemical composition: Organic modified silicone oil
- Appearance: Light yellow transparent liquid
- Active content: 100%
- Solvent: None

## Product features

- Excellent compatibility
- Excellent leveling ability
- Good feel
- Not effect recoatability

## Application areas

DCA-1331 can be widely used in various solvent-based coating systems especially in Expoy system :

- Solven systems
- Self-leveling epoxy floor coating

## Similar Products: Tego-1484

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

## Addition Method

It can be added at any stage of production

Recommended dosage: 0.1-1.0% of the total formulation

**Packaging and storage:**

25KG iron drum, stored in a cool and dry place.
