

Silicone Leveling agent DCA-110

 dcachem.com/portfolio/silicone-leveling-agent-dca-110

Introduction

DCA-110 is the solution of polyester modified polysiloxane , it has excellent compatibility with most paint resins and has no reverse influence on recoatability. It provide mar resistance for coating film and improve the gloss of the paint film..

Physicochemical Data

- Chemical composition: Polyester modified polysiloxane
- Appearance: colorless transparent liquid
- Active content: 25%
- Solvent: solvent naphtha

Product features

- Good compatibility with most of resin
- Excellent sliperiness
- Anti scratch
- Not effect recoatability

Application areas

DCA-110 could be used in solvent-based coatings and UV systems

- Water based wood coating
- Water-based industrial coatings
- UV curable coatings, ink and other systems.

Similar Products: BYK-310

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

Usually, it could be charged at random stage during the produce with **0.1%** to **1%** dosage to gross.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
