

# Silicone Leveling agent DCA-31357

 [dcachem.com/portfolio/silicone-leveling-agent-dca-31357](https://dcachem.com/portfolio/silicone-leveling-agent-dca-31357)

## Introduction

DCA-31357 is a polyether-modified organosilicone compound. It exhibits excellent compatibility with most resin systems, is water and oil compatible, and has no adverse effects on re-coatability. It provides outstanding leveling, wetting, and slip properties.

## Physicochemical Data

- Chemical composition: Polyether-modified silicone oil
- Appearance: Light yellow transparent liquid (solid at temperatures below 15 degrees, can be used after heating)
- Active content: 100%
- Solvent: None

## Product features

- Good compatibility in water and oil
- Not effect on re-coatability
- With slip properties
- Outsatanding leveling and wetting

## Application areas

Suitable for various water and solvent-based systems and UV-curable systems.

## Addition Method

The dosage varies depending on the specific application system, generally ranging from 0.1% to 1% of the total formulation. It can be added at any stage of production.

## Packaging and storage:

25KG iron drum, stored in a cool and dry place.
