

Anti Graffiti Agent DCA-UV2838

 dcachem.com/portfolio/anti-graffiti-agent-dca-uv2838

Introduction

DCA-UV2838 is a special modified silicone with acrylic group. It is suitable for UV coatings systems and it could react in UV system. Because of its special structure, its polysiloxane chain could stay in the surface after its reaction and provide excellent anti-block and anti-graffiti properties.

Physicochemical Data

- Chemical composition: Modified silicone
- Appearance: Yellow transparent liquid
- Active content: 100%
- Solvent: None

Product features

- DCA-UV2838 decrease the surface tension and could accelerate the wetting ability
- DCA-UV2838 could provide outstanding anti-block and anti-graffiti effect.

Application areas

DCA-UV2838 is recommended to use in the UV coating

Addition Method

The dosage varies according to different usage systems, generally ranging from 0.1% to 1% of the total formulation. It can be added at any stage of production.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
