Silicone Leveling agent DCA-1435

dcachem.com/portfolio/silicone-leveling-agent-dca-1435

Introduction

DCA-1435 is a polyether-modified polysiloxane that has excellent compatibility with most resin systems, does not have any adverse effects on recoatability, and provides excellent leveling properties. It provides a certain amount of defoaming effect and is particularly suitable for self-leveling epoxy floor coating systems.

Physicochemical Data

• Chemical composition:Polyether-modified silicone oil.

• Appearance: Light yellow transparent liquid

• Active content: 100%

• Solvent: None

Product features

- Excellent leveling ability
- Help for defoaming
- Not effect recoatability

Application areas

DCA-1435 can be widely used in solvent system such as Expoy,UPE and UV system, especially in self-leveling epoxy floor coating systems

Similar Products: Momentive-7500

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

It can be added at any stage of production

Recommended dosage: 0.1-1.0% of the total formulation

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
