Silicone Antifoam DCA-352W

dcachem.com/portfolio/silicone-antifoam-dca-352w

Introduction

DCA-352W is an organic silicone defoamer suitable for solvent-based systems. It has a strong defoaming capability, enabling rapid bubble elimination in paint production. It also offers excellent compatibility and high safety in use, minimizing the risk of paint film defects.

Physicochemical Data

- Chemical composition: Defoaming Organic Silicon Compound
- Appearance: Colorless Transparent Solution
- Active content: ≤3%
- Solvent:Mixed Aromatics

Product features

- Compatibility: Excellent compatibility, does not cause cloudiness in the system, and does not affect gloss.
- **Defect Prevention**: Helps eliminate defects like fish eyes, pinholes, craters, and hidden bubbles in the paint film.
- Safety: High safety in use, reducing the risk of paint film defects.

Application areas

DCA-352W is suitable for all solvent-based systems.

Similar Products: BYK-141

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

Typically 0.1-1% of the total amount, can be added at any stage of production.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
